

Lawrence Livermore National Laboratory
Supply Chain Management Department

January 21, 2014

Attention: Interested Offerors

Subject: **Amendment 1 to CORAL Request for Proposal (RFP) Number B604142**

This letter constitutes Amendment 1 to RFP B604142. Amendment 1 is issued to clarify lease-to-ownership requirements for ANL and ORNL. Therefore, the Funding section of the RFP letter is deleted in its entirety as written and substituted with the following.

“FUNDING

Funding to perform all of the work described in the Sample Subcontracts is not presently available. LLNS anticipates funding to become available in a manner that will allow the selected Offerors to perform continuously until completion.

The working budget range for *each* CORAL NRE subcontract is approximately \$25M. However, the actual award(s) amount may be more or less depending on the Laboratories' perceived value of the proposal(s), resulting negotiations, and annual appropriated funding from Congress.

The working budget range for *each* CORAL machine build subcontract is up to \$155M. However, the actual award amount may be less depending on the Laboratories' perceived value of the proposal(s), resulting negotiations, and annual appropriated funding from Congress. Exercise of any proposed options will depend on prices proposed by Offerors for the options, the value to the Laboratories of exercising the options, and annual appropriated funding from Congress.

For ANL, Offerors must be able to offer a lease to ownership plan, in accordance with the terms and conditions of the ANL “Master Lease to Ownership Agreement” and the ANL “Lease to Ownership Order” in order to be considered for award. ANL reserves the right to later solicit and obtain third party financing dependent on market conditions, etc., prior to delivery of the equipment.

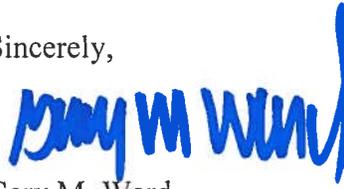

For ORNL, Offerors must be able to offer financing in order to be considered for award. Offerors must propose per the ORNL CORAL Draft Lease Agreement. ORNL may choose to exercise the option for third party leasing contained in the ORNL CORAL Draft Lease Agreement.

LLNS intends to acquire its machine using direct funding; however, LLNS reserves the right to use LTO financing for a portion of its machine depending on annual appropriated funding from Congress.”
